

KAP Contraception Exploratory

Sep 22, 2019

Demographics

Table 1: Summary descriptives table

	[ALL] N=220	N
Subject's age in years	31.1 (7.6)	220
Subject's occupation:		220
1, Student	16 (7.3%)	
2, Housewife	108 (49.1%)	
3, Working	96 (43.6%)	
(Derived) Subject's education:		220
1, Primary or Middle School	2 (0.9%)	
2, High school or Diploma	37 (16.8%)	
3, University degree and above	181 (82.3%)	
Subject's marital status:		220
Married	185 (84.1%)	
Single	35 (15.9%)	
Subject's marital status duration in years	8.8 (7.7)	185
Subject's Living children:		218
0	124 (56.9%)	
1	44 (20.2%)	
2	43 (19.7%)	
3	6 (2.8%)	
4	1 (0.5%)	

Knowledge and Attitude

Table 2: Summary descriptives table

	[ALL] N=220	N
Subject's knowledge whether pregnancy can be prevented by choice: 1, Yes	212 (96.4%)	220
Subject's knowledge on rhythm method as type of contraception: 1, Yes	79 (100.0%)	79
Subject's knowledge on barrier method as type of contraception: 1, Yes	193 (100.0%)	193
Subject's knowledge on oral contraceptive pill as type of contraception: 1, Yes	184 (100.0%)	184
Subject's knowledge on IUCD as type of contraception: 1, Yes	143 (100.0%)	143
Subject's knowledge on Implants as type of contraception: 1, Yes	5 (100.0%)	5
Subject's knowledge on Injection as type of contraception: 1, Yes	26 (100.0%)	26
Subject's knowledge on Other types of contraception	.	0
Subject's knowledge on sterilisation as Type of contraception: 1, Yes	63 (100.0%)	63
Subject's knowledge on Abstinence as type of contraception	.	0
Subject's knowledge on type of contraception as none	.	0
Subject's attitude on willing to use contraception: 1, Yes	62 (32.8%)	189
Subject's practice on contraception used before: 1, Yes	56 (28.4%)	197
Subjects' ease with acceptability of IUCD: 1, Yes	159 (77.6%)	205
Subject's satisfaction with the contraceptive method used: 1, Yes	41 (70.7%)	58
Subject's preference for IUCD: 1, Yes	68 (100.0%)	68
Subject's preference for condoms: 1, Yes	60 (100.0%)	60
Subject's preference for natural methods: 1, Yes	27 (100.0%)	27
Subject's digital app usage for tracking safe days: 1, Yes	14 (100.0%)	14
Subject's digital app knowledge for tracking safe days: 1, Yes	9 (100.0%)	9

Subject's counselled for Yuwa Clinic's: 1, Yes	9 (100.0%)	9
Subject's concern about family/husband's decision on contraception important: 1, Yes	10 (100.0%)	10

IUCD vs Pill

Table 3: Summary descriptives table

	[ALL] N=167	N
Subject's practice on contraceptive method used before: OCP=1: 1, Yes	30 (52.6%)	57
Subject's practice on contraceptive method used before: I pill=2: 1, Yes	5 (8.8%)	57
Subject's practice on contraceptive method used before: IUCD=3: 1, Yes	28 (49.1%)	57
Subject's practice on contraceptive method used before: Injection=4: 1, Yes	1 (1.8%)	57
Subjects' misconception with IUCD or Pill: migration=1: 1, Yes	1 (0.6%)	156
Subjects' misconception with IUCD or Pill: failure=2: 1, Yes	12 (7.7%)	156
Subjects' misconception with IUCD or Pill: cancer=3: 1, Yes	3 (1.9%)	156
Subjects' misconception with IUCD or Pill: bleeding=4: 1, Yes	18 (11.5%)	156
Subjects' misconception with IUCD or Pill: infection=5: 1, Yes	16 (10.3%)	156
Subjects' misconception with IUCD or Pill: pain=6: 1, Yes	11 (7.1%)	156
Subjects' misconception with IUCD or Pill: afraid of using contraceptives=7: 1, Yes	3 (1.9%)	156
Subjects' misconception with IUCD or Pill: Don't know=8: 1, Yes	103 (66.0%)	156
Subjects' misconception with IUCD or Pill: wt loss=9: 1, Yes	1 (0.6%)	156
Subject's concern with use of IUCD: wt gain=1: 1, Yes	16 (48.5%)	33
Subject's concern with use of IUCD: hormonal imbalance=2: 1, Yes	5 (15.2%)	33
Subject's concern with use of IUCD: mood swings=3: 1, Yes	4 (12.1%)	33
Subject's concern with use of IUCD: fertility problems=4: 1, Yes	8 (24.2%)	33
Subject's concern with use of IUCD: sleeping problems=5: 1, Yes	1 (3.0%)	33
Subject's concern with use of IUCD: UTI=6: 1, Yes	1 (3.0%)	33
Subjects' concern with acceptability of IUCD: safety=1: 1, Yes	153 (91.6%)	167
Subjects' concern with acceptability of IUCD: efficacy=2: 1, Yes	22 (13.2%)	167
Subjects' concern with acceptability of IUCD: cost=3: 1, Yes	4 (2.4%)	167
Subjects' concern with acceptability of IUCD: service delivery=4: 1, Yes	37 (22.2%)	167
Subjects' concern with acceptability of IUCD: accessibility for FU=5: 1, Yes	3 (1.8%)	167
Subjects' preference with timing of IUCD: Soon after delivery=1: 1, Yes	12 (30.8%)	39
Subjects' preference with timing of IUCD: 2m after delivery=2: 1, Yes	3 (7.7%)	39
Subjects' preference with timing of IUCD: far apart from delivery=3: 0, No	39 (100.0%)	39
Subjects' preference with timing of IUCD: no specific timings=4: 1, Yes	21 (53.8%)	39
Subjects' preference with timing of IUCD: with CS=5: 0, No	39 (100.0%)	39
Subject's reasons for preference of pills: Safe=1: 1, Yes	17 (38.6%)	44
Subject's reasons for preference of pills: Easy to consume=2: 1, Yes	26 (59.1%)	44
Subject's reasons for preference of pills: Easily available=3: 1, Yes	3 (6.8%)	44
Subject's reasons for preference of pills: Not painful=4: 1, Yes	2 (4.5%)	44
Subject's reasons for preference of tubal ligation: TL done=1: 1, Yes	15 (34.9%)	43
Subject's reasons for preference of tubal ligation: May opt TL=2: 1, Yes	19 (44.2%)	43
Subject's reasons for preference of tubal ligation: After 2nd child=3: 1, Yes	4 (9.3%)	43
Subject's reasons for preference of tubal ligation: Once family is complete=4: 1, Yes	1 (2.3%)	43
Subject's reasons for preference of tubal ligation: Came for TL=5: 1, Yes	4 (9.3%)	43
